ABOUT US

Montreal institute is an emerging higher educational college based in Colombo, Sri Lanka. We intend to bring built environment related courses and opportunities for students to achieve their career goals in construction industry.

We, Montreal Institute believe charting the right course forecasting the future is the right key. For this to happen, competencies must be enhanced alongside a more holistic, integrative view of the industry. We must also heighten awareness of professional, strengthening their connection and relevance to the business goals and strategies.

We an emerging educational institute providing student's with a complete package in all our study programs by introducing immersive learning. We believe that students need to learn new skills, upgrade existing capabilities and complete compliance training. It is not about conducting a few sessions of traditional study related to the subject to ensure student follows and gets through the exam to qualify.

Our team have initially extended our services into the fields namely; interior and spatial designing, CADD, project planning and control, Primavera P6 EPPM, building design and Technology, BIM with Revit (Arch, MEP and Structural) and landscaping etc. where high demand exists for career opportunities. An experienced and well versed management team with years of experience to go with an excellent panel of lecturers is our strength to deliver what we promise. Every student joins us is bound to go through immersive based learning experience and industrial collaboration in pursuing with their career building exercise.

Our vision is to be a leading higher educational institute in engineering that provides a transformative education to create leaders and innovators, and generates new knowledge for society and industry

THE COURSE FOR YOU!

Diploma in Computer Aided Design & Drafting

The intention of the program is to provide self-employment opportunities for the students who are completing the course due to its demand prevails in the construction industry.

The unit enable students to get proficiency in CADD fundamentals, manual drafting, two dimensional drawings, three-dimensional design, and modeling. In addition to this, course focus on driving the students towards a practical exposure in the construction industry and make them competent so they would provide their best work in their field. This attempt makes students to implement their practical experience obtained during the course period in their future job profile and can actually shape the future aspects of this domain.

We Provide Our Students With Many Flexible Facilities

Student Portal

This portal is made in UK university standard and is provided only by our institute for our Diploma students compared to our local colleges. At the end of every class we will be uploading the online class video link and lecture materials that our students can use through the portal in case they missed a class or want to revise the lesson.

Certification

Montreal institute provides our students a globally recognized UK certification offered by Learning Resource Network (LRN) which can be attested by British Council, Sri Lanka and Foreign Ministry of Sri Lanka.

Sample Assignment

Montreal institute will be providing sample assignments and all kinds of other materials that a student will need to complete their assignments. If there is any problem or difficulty in doing the assignment you can talk to the lecturer & they will help in clearing doubts and problems.

Major Projects and Site Visitations

A major project and field visits will be arranged for our students to have industrial exposure.

Expertise Lecturers

One of Montreal Institute's great assets is its Panel of lecturers. Our philosophy is simple; to ensure that only renowned subject specialists with industry experience are elected to teach in our courses.

Training

We are a group of company involved in Engineering and renewable energy. Thus, we also provide training for students from our Montreal Green Engineering Pvt Ltd and other partnered organizations.
